

Deck Oven

Model : BTDO-403

FEATURES & BENEFITS

■ Microprocessor heating control

A consecutive step by step control method with a microprocessor allows for heating control from 0~100% to enable even and precise temperature control.

■ Heat distribution

A heating system that enables even heat distribution inside the oven and heat retention help ensures even colorization of the product.

■ Deck size

4 European tray size capacity per deck.

■ User-friendly display

Time setting allows for desired time setting using arrow buttons.

■ See-through window

Able to observe baking progress.

■ Adjustable legs & casters

■ Temperature control top & bottom heating element per deck

■ Overheat protection sensor

Once the unit is plugged in, protection sensors will set in to prevent serious burns.

■ Safety enforced

Each unit is thoughtfully designed with well-rounded corners for the benefit of bread bakers and chefs.

■ Variety

Perfect for variety of different bread types including cakes, pastries, and all other hard breads.
